B.Sc. in Computer Science from Universidade Federal do Rio Grande do Sul, elected the best Computer Science College in Brazil. Programming language agnostic, I have four years of experience developing on both back and front-end of websites and web-based applications in startup and marketing agency environments.

### Professional Experience:

#### *Software Engineer at Azion Technologies (CDN)*

May/2016 – Present

Cloud platform for content delivery and acceleration with global operations and more than 25 points of presence around the globe.

- Development and maintenance of components on the Azion CDN configuration software.
- Head of front end development.
- Responsible for the full stack (server-side application logic and front-end development).
- Test Driven Development

#### *Software Engineer at Superplayer (Startup)*

September/2015 – April/2016

Music streaming service with more than a million active users on the web, android and iOS.

- Development and maintenance of components on the superplayer.fm music player platform.
- Responsible for the full stack (server-side application logic and front-end development).
- Data and results analysis.
- A/B Testing.

#### *Intern at Pmweb (Digital Marketing Agency)*

March/2014 – August/2015

Multiple times award winner digital marketing agency focused on the hospitality business.

- Development and maintenance of websites for hotels and resorts.
- Responsible for the full stack (server-side application logic, database management and front-end development).
- E-mail marketing development.

#### *Intern at Sthima (Startup)*

April/2013 – February/2014

B2B web base CRM software development company targeting medium-sized enterprises.

- Development and maintenance of cloud-based CRM software.
- Responsible for the full stack (server-side application logic and front-end development).
- Database management.
